WORK EXPERIENCE

NextJS Developer

📅 10/2024 - Present 📍 Vadodara, Gujarat

Heliconia Solutions

- I have experience in sprint and team leadership, working under Agile methodology and Scrum to deliver better results. I break down large projects into manageable sprints and ensure on-time delivery by actively communicating with the design team, QA, and backend developers. I actively participate in retrospectives at the end of each sprint, learning new technologies, providing innovative solutions, adapting quickly to challenges, and delivering effective solutions.
- Tuto.ph** - Tubo.ph is a user-friendly HRMS platform designed for manpower agencies to simplify employee management and timekeeping. It replaces outdated biometric systems with a modern app available on iOS and Android, offering features like attendance tracking, payroll management, and role-based access. With Tubo, companies can manage multiple agencies, assign roles, schedule shifts, and track employee activities in real-time. The platform also includes an e-wallet for seamless transactions like salary payments, bill payments, and top-ups.

Software Developer

📅 05/2023 - 09/2024 📍 Vadodara, Gujarat

Immence Enterprise Pvt Ltd

- Immencer's 2.0** - Developed Immencer, an employee management system with admin and employee panels. The admin panel handles HR tasks like employee management, asset allocation, attendance tracking, leave management, and policy dissemination. The employee panel provides access to personal details, attendance records, leave requests, and training resources. Used React.js, TypeScript, and Material-UI for a seamless, responsive UI/UX. Integrated APIs for efficient data exchange and ensured project success by meeting deadlines and maintaining code quality.
- Stonewels** - Developed a sleek e-commerce website for Stonewels using Next.js (TypeScript), showcasing a variety of jewelry products like Rings, Earrings, Necklaces, and Custom Jewelry. The site includes features such as a wishlist, custom design requests, a blog for jewelry tips, a ring size guide, and a contact form. Additionally, an Admin Panel (similar to a CMS) was created for easy content and products management of products, customer inquiries, custom requests, and blog content, ensuring a smooth and engaging user experience.
- Kohereza** - Kohereza International, founded in 2019 in Surat, Gujarat, is an import-export leader specializing in premium products like Construction Chemicals, Jewelry, Organic Grains, and Indian Handcrafted Items. We built their multilingual website using Next.js 14.2 with features like dynamic language support, static site generation, SEO, and responsive design, delivering a fast, user-friendly experience showcasing Kohereza's commitment to quality and global outreach.
- Azle.io** - Azle revolutionizes customer support by integrating multiple channels into one platform, enhancing responsiveness and workflow efficiency. Its intuitive admin panel, customization options, data-driven insights, and focus on security and scalability boost customer satisfaction. Contributed by developing an Internal Chat Module, implementing Scroll Pagination, and integrating a Customer Merge Module. Used Redux for global state management, enhanced UI with form validation, and fixed bugs to improve user experience and platform functionality.

WORK EXPERIENCE

Freelance - Software Developer

📅 05/2022 - 04/2023 📍 Remote

- Developed and delivered responsive web applications based on client requirements.
 - Collaborated with clients and backend teams for seamless project execution.
 - Optimized APIs and frontend performance for efficiency and scalability.
 - Refactored codebases and used optimized libraries for better maintainability.
 - Managed multiple projects and ensured on-time delivery with effective communication.
-
