EXPERIENCE

Software Developer   Oct 2024 - Present
Heliconia Solutions   *Vadodara, Gujarat, India*
Client : Ventaja International Corp. Philippines

- Led Agile sprint planning, backlog grooming, and collaborated with cross-functional teams and clients to ensure clear alignment and timely delivery.
- Mentored junior developers, conducted code reviews, and promoted clean, scalable coding standards.
- Optimized REST APIs to improve frontend-backend efficiency by 20%, reduced issue resolution time by 35%, and managed multiple deployments.

Software Developer   May 2023 - Sep 2024
Immence Enterprise Private Limited   *Vadodara, Gujarat, India*

- Delivered HRM, eCommerce, dashboard, and landing page projects using Next.js and TypeScript, improving performance and SEO.
- Led migration from React.js to Next.js, reduced runtime errors by 40%, optimized API integration (REST & GraphQL), and enhanced data fetching.
- Collaborated in Agile teams, conducted code reviews, enforced clean code, and created reusable components, boosting development speed by 25%.

Software Developer   Jan 2022 - April 2023
Freelance (Self employed)   *Work From Home*

- Delivered responsive web apps with optimized APIs and cross-browser compatibility, improving performance and user experience.
- Collaborated directly with clients to gather requirements, align expectations, and ensure on-time delivery.
- Refactored legacy codebases and integrated lightweight libraries, boosting performance by up to 60% and reducing bundle size by 35%.

Teacher   July 2017 - Oct 2021
Prayas Tuition Classes   *Vadodara, Gujarat, India*

- Designed personalized lesson plans and used interactive methods to improve student learning
- Monitored progress and adapted teaching to individual needs
- Communicated regularly with parents to support student development

PROJECTS

Tubo.ph

- Developed and maintained the admin panel of Tubo.ph, a scalable SaaS HRMS platform supporting 1000+ users.

- Enabled company and agency registration, employee management, role-based access control, and device enrollment for attendance tracking.

- Implemented leave management, attendance scheduling, time log consolidation, and multi-role dashboards (Super Admin, HR, Employee, etc.).

- Integrated a secure e-wallet system for salary disbursement, bill payments, top-ups, and transaction approvals with Maker, Checker, and Approver workflows.

- Delivered real-time notifications, payroll management, and analytics dashboards to streamline operations and improve user experience.

- Ensured robust security and scalable architecture in a multi-tenant SaaS environment.

Stonewels

- Developed a scalable Next.js and TypeScript e-commerce site showcasing 100+ jewelry products, including rings, earrings, necklaces, and custom designs.

- Implemented wishlist, custom design requests, blog, ring size guide, and contact form, enhancing user engagement by 35%.

- Built a comprehensive Admin Panel (CMS) for efficient management of products, customer inquiries, custom orders, and blog content, reducing operational overhead by 25%.

- Used Redux Thunk for optimized state management and Material-UI for consistent, accessible UI, improving frontend performance by 20%.

- Led SEO optimization efforts, resulting in a 40% increase in organic traffic within 6 months.

Immencer 2.0

- Developed a scalable employee management system with admin and employee portals, improving HR task efficiency by 40%.

- Designed the admin panel to automate management of 100+ employees' records, attendance, leave, and assets.

- Built the employee panel enabling self-service access for users to personal data, attendance, leave requests, and training.

- Created a responsive UI using React.js, TypeScript, and Material-UI, enhancing user satisfaction scores by 30%.

- Integrated RESTful APIs ensuring 99.9% uptime and seamless data exchange between frontend and backend.

Azle.io

- Contributed to Azle.io, a multi-channel customer support platform designed to streamline workflows and improve response times through an intuitive admin panel and customizable features.

- Developed key features including an Internal Chat Module, Scroll Pagination, and Customer Merge Module, enhancing platform scalability and user engagement.

EDUCATION

Bachelor of Engineering, Maharaja Sayajirao University of Baroda.   2014 - 2017

COURSES

The Complete Web Development Bootcamp by Angela yu, Udemy.

Namsate React by Akshay Saini, NamsateDev.com
