ABOUT

Senior Frontend Engineer with 4 years 8 months of experience building scalable web applications with React.js, Next.js, and TypeScript. Strong in frontend architecture, reusable component systems, state management, API integration, and performance optimization. Owns work end-to-end from technical planning and implementation through production delivery, with hands-on Agile execution, cross-functional collaboration, code reviews, and mentoring.

SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand.
UI & Styling	Tailwind CSS, Material UI, Radix UI, Bootstrap, HTML, CSS, Responsive Design.
Architecture	Frontend Architecture, Reusable Component Systems, Cross-Browser Development.
APIs & Backend	REST APIs, GraphQL, Node.js, Express.js, Next.js API Routes.
Testing	Jest, React Testing Library, Unit Testing, Component Testing.
Build & Delivery	Git, GitHub, Webpack, Babel, CI/CD, Vercel, Netlify.
AI-Assisted Development	Claude Code, Cursor, ChatGPT, AI-Assisted Development, Agent Orchestration.
Engineering Practices	Agile/Scrum, Sprint Planning, Code Reviews, Peer Reviews, Mentorship.

SELECTED PROJECTS

Tubo.ph — Multi-tenant SaaS HRMS Platform

- Owned sprint planning and technical delivery for a multi-tenant SaaS HRMS serving 1,000+ users across companies and agencies. Engineered granular RBAC across five-plus role types (Super Admin, HR, Approver, Employee), each with a tailored dashboard and permission scope.
- Implemented biometric identity verification (face enrollment + liveness detection) and manual KYC review to gate digital wallet activation, reducing fraud exposure on salary disbursement.
- Delivered a fintech grade e-wallet module salary disbursement, bill payments, governed by a Maker–Checker–Approver workflow to meet audit and compliance requirements
- Architected the HR operations core multi-format attendance/timekeeping, device enrollment, shift scheduling, multi-level leave approval on a reusable component and Zustand state layer reused platform-wide.

Stonewels — E-commerce Platform + CMS

- Built and shipped a Next.js + TypeScript e-commerce platform supporting 100+ products, including wishlist, custom-design requests, blog, and product-sizing workflows.
- Developed a CMS administration panel enabling non-technical users to manage products, content, and customer inquiries without engineering support.
- Owned custom-order and inquiry workflows end-to-end, connecting customer-facing experiences with administrative workflows.

Immencer 2.0 — RBAC Employee Management System

- Built a two-portal (Admin and Employee) system automating records, attendance, leave, and asset management for 100+ employees.
- Developed the employee self-service portal for attendance, leave requests, and training access.
- Built the UI using React.js, TypeScript, and Material-UI, and integrated RESTful APIs for reliable frontend-backend data exchange.
- Worked with Node.js on the backend integration layer to support attendance, leave, and asset data flows between portals.

Azle.io — Omnichannel Customer Support Platform

- Contributed to a multi-tenant support platform that unifies customer queries from multiple social channels into a single company inbox, letting managers assign and resolve conversations as one team.
- Created a Customer Merge module that deduplicates a customer's queries across channels into one thread, eliminating fragmented conversation history for agents.
- Added seat-based team invites and role assignment for company accounts, plus an Internal Chat Module and infinite-scroll pagination for high-volume conversation lists.

EXPERIENCE

Senior Software Developer — Frontend Team Lead

Aug 2025 - Present

Rudraak Technologies

Remote

- Lead frontend engineering and contribute to technical architecture decisions across React.js and Next.js applications. Drive sprint planning, task breakdown, and product delivery in collaboration with product, design, backend, and QA teams.
- Design scalable frontend architectures and reusable component systems to improve maintainability and development efficiency.
- Mentor developers through code reviews, technical guidance, pair programming, and knowledge sharing.

Senior Software Developer

Oct 2024 - Jun 2025

Heliconia Solutions

Vadodara, Gujarat, India

- Lead Agile sprint planning and backlog grooming, working directly with cross-functional teams and clients to keep delivery timelines and priorities aligned.
- Mentor junior developers through code reviews and coding-standards guidance, raising overall code quality and consistency across the team.
- Optimized REST API integration to measurably improve frontend responsiveness, and cut average issue-resolution time by streamlining the debugging and deployment workflow.

Software Developer

May 2023 - Sep 2024

Immence Enterprise Private Limited

Vadodara, Gujarat, India

- Delivered HRM, e-commerce, dashboard, and landing page projects using Next.js and TypeScript, with a focus on performance and SEO.
- Led the migration of a legacy React.js codebase to Next.js, significantly reducing runtime errors and improving API data-fetching efficiency (REST & GraphQL).
- Built a shared library of reusable components adopted across projects, speeding up development for the wider team and enforcing consistent UI patterns.
- Used Node.js alongside Next.js API routes to handle backend integration and server-side logic for HRM and e-commerce projects.

Software Developer

Jan 2022 - April 2023

Freelance (Self employed)

Work From Home

- Built responsive, cross-browser web applications end-to-end for independent clients, from requirements gathering through deployment.
- Refactored legacy codebases and replaced heavy dependencies with lightweight alternatives, notably reducing bundle size and improving load performance.
- Built and connected Node.js-based backend endpoints for client projects requiring custom APIs beyond standard frontend integration.

EDUCATION

Bachelor of Engineering, Maharaja Sayajirao University of Baroda.
